Let's move together

The art of Cloud Office Migration.

Refreshingly simple Cloud Office migrations.

The value of Cloud is clear. It's no longer a question of if or when to migrate, but what and how.

But it's rarely as simple as A-to-B, and the path can be paved with complexity.

Well... challenge accepted. As the problem solvers of Cloud Office migrations, we make complexity feel refreshingly simple, and your migration feel reassuringly stress-free.

Transvault combine world-class technology with unrivalled expertise, experience and integrity; migrating your workloads quickly, securely and seamlessly.

It's why businesses trust in Transvault.

If you're thinking about migrating to the Cloud, you've come to the right place.

The benefits of Cloud.

Cloud & Enterprise.

The benefits of moving your users, files and email archives to the Cloud.

It's the clear way forward.

Saves money.

You save on license, infrastructure and resource costs incurred by maintaining a separate email archive. By centralising data in the Cloud, you will reduce the cost of data administration and everything will be on-demand, so you only pay for what you use.

Smooths operations.

You'll have better operational efficiency with all your email data in one place, accessible from wherever your teams are. eDiscovery also becomes quicker and easier.

Up-to-date.

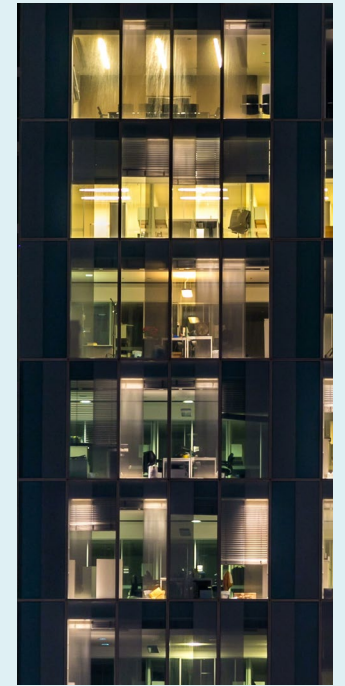

Cloud software is almost always ahead of on-premises software. Moving to the Cloud reduces the number of systems to manage. Cloud security is often significantly better than on-premises servers; your data is always compliant and protected by world-class security that is constantly evolving.

Simplifies risk management.

You'll have improved business resilience with 'access anywhere' capabilities. Automated security tools will reduce your attack surface and automated compliance checks will ensure you are up-to-date with the latest legislation. You can also avoid the data risk of PST files by including them in your migration to the Cloud.

Anticipating the bumps.

Cloud Office migration can seem like a daunting task – it can't fail. Which makes choosing the right technology partner all the more critical.

Secure and compliant

The critical element; if you can demonstrate data integrity by migrating using Transvaul's proven, secure and compliant method, any future eDiscovery against the data can avoid the risk of being legally invalidated.

Time and cost

Cloud migrations can bring real value if done right, but also a huge cost if they go wrong. Migration duration and overall cost can be excessive if the migration of significant data volumes are not managed in the right way, using the right technology.

End-user experience

In order to do their job, users expect to be able to locate and retrieve their data (e.g. emails, files, archived emails) quickly and easily. If your migration project fails, you face massive user frustration and the resulting impact on business productivity.

Why Transvault?

Just sit back, relax and enjoy the move.

With Transvault, you're
in the safest hands.

World-class products and service

Since building the world's first email archive migration tool, we've delivered over 3,200 successful projects with our Partners in 56 countries and continue to innovate across a suite of world-class tools.

Secure, robust, adaptable and extensible – our technology has been the driving force behind some of the world's most challenging migrations.

A suite of solutions to power your success

As migration specialists, we combine the best tools with the best people, to deliver Cloud Office migrations quickly, securely and seamlessly.

But our capabilities go far beyond this, delivering Cloud-agnostic email archive migration from almost any source, and sprint solutions for low-volume data.

100% focused on the outcome you need

From the straight-forward to uniquely-complex, we focus entirely on outcomes; going above-and-beyond to make each project a success.

On the rare occasions when we face something we've not seen before, we offer custom development and market-leading support to ensure we always deliver.

The best people behind the best tools

We're passionate about solving complex challenges, so we say it straight and do it right. No excuses, and no shortcuts. World-class technology meets integrity.

There's no substitute for hard work and our Delivery Partners, Managed Services and Support Teams work tirelessly and collaboratively to get the job done.

Why Transvault?

Seamless. Compliant. User-focused migrations.

It's where Transvault's
expertise shows.

Minimal business impact.

Transvault will ensure a seamless user experience during your migration to the Cloud, allowing your people to carry on business as usual without missing a step.

Streamlined migrations.

You'll quickly be able to reduce your legacy infrastructure costs and see tangible return on investment.

Continuous innovation.

We'll always keep our software at the cutting edge to make sure it's secure, robust, adaptable and extensible, whatever your future needs.

Legally watertight.

You'll have full chain-of-custody audit records, giving credibility to future eDiscovery.

Extensive sources and destinations.

We can work with the broadest range of supported archive sources and destinations that you'll find anywhere in the market.

Why Transvault?

You're in good company.

Transvault is the choice of
Enterprise businesses across
the world for Cloud Office
migrations.

"Transvault has pioneered the migration market space and has produced a benchmark whereby all migration companies are measured."

Dennis Wild, Product Manager, Hewlett-Packard

"Knowing that Transvault is able to respond quickly to new scenarios means we can deliver a robust solution to our customers."

Dorothy O'Regan, Principal Technical Specialist at NUI Galway

"The big thing for me was the quality of the migration. Aside from ensuring staff could still access their emails, we have requirements around email retention just like most organisations. We need to be consistent with regulatory and legal requirements to keep email records fully intact and discoverable, and not compromised as a result of the move."

Michael Day, vice president of Information Technology at DCHS

"On Monday morning our users came in to find all their emails and address books intact and fully functional. We could just get on with business as usual"

Eugene vanVueren, IT Manager, Webber Wentzel Bowens

"I have to say that I have been impressed by Transvault's agility and flexibility throughout our Office 365 migration project"

Messaging Specialist, Large IT Service Company

3200+

projects across 56 Countries.

The best technology.

Our solutions.

Email Archive Migrations.

Transvault Migrator is the proven and compliant way to migrate enterprise email archives. With a solution for virtually all existing proprietary archive platforms, services and appliances, both on-premises and in the Cloud, including Microsoft 365.

Key benefits

With a focus on performance, security and user experience, Migrator delivers the most dependable and comprehensive migration product for projects with even the most complex enterprise-level requirements.

- Over 3,200 successful migrations, including some of the largest and most complex in the world
- Secure, robust, and adaptable software with over 18 years continual development and innovation
- Industry leading, outcome focused support and customer service to ensure successful migrations
- Legally defensible migrations, with full chain-of-custody capabilities for future eDiscovery
- A seamless user experience as you migrate, minimising the impact on your business
- Streamlined migrations enable you to quickly reduce your legacy infrastructure costs and start proving ROI from your new service
- Broadest range of archive sources and destinations supported in the market.

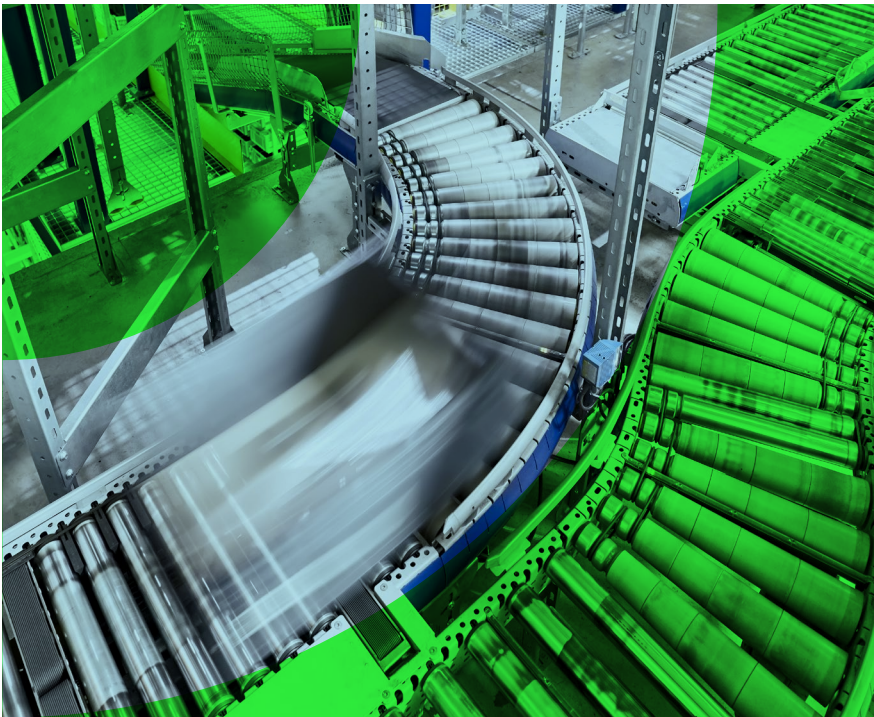

Migrator 
by Transvault

“We lead with Transvault now... it’s because of the people that we get to work with and the quality and capability of their software.”

Greg Hickey Senior Account Executive at Daymark Solutions Inc

Our solutions.

Data-Lite Email Archive Migrations.

Optimised for smaller data volumes, Transvault Sprint is the most intuitive, seamless and cost-effective way to migrate legacy email archives from Enterprise Vault or Enterprise Archive Solution (EAS) to Microsoft 365.

Key benefits.

- Ideal for smaller, simpler migration projects and for the most common sources and targets
- Secure, robust, adaptable and extensible software with over 18 years continual development and innovation
- Industry leading, outcome focused support and customer service to ensure successful migrations
- You'll have full chain-of-custody audit records, giving credibility to future eDiscovery
- A seamless user experience as you migrate, minimising the impact on your business.

"The product had enough flexibility to handle our specific requirements and get us the speeds we were looking for in terms of throughput to Office 365. I would not hesitate in recommending this to anyone asked."

Ian Gates Director of Group IT, Capita

Managing Journals and PST files.

PST Migration.

PSTs could be anywhere on your network, containing unknown and unclassified content, creating a major data compliance risk for your business.

With breaches of data compliance standards such as GDPR or CCPA levying fines of up to 4% of your global revenue, and the immeasurable reputational damage from a data breach, it's no wonder that this particular business risk has become a top priority for those who understand the impact. Moving your PST data inside the security governance of Microsoft 365 is the most popular response to this risk.

Transvault PST Insight combines world-class technology with unrivalled expertise, experience and integrity to migrate your PSTs securely and seamlessly.

PST Insight gives business and IT managers the power to find PSTs across the enterprise, understand what's in them and manage their contents in line with business, compliance and operational needs.

Journal Migration.

Journals are frequently used as a method to store a company's email history in an immutable way so that audit integrity is retained.

If your enterprise uses email journaling to respond to legal, regulatory or compliance requirements, a move to Microsoft 365 often means making decisions about where to maintain your legacy journal following your migration. The challenge, if you want to migrate your journals to Microsoft 365, is that it doesn't provide a conventional journal mailbox and associated data structure.

Transvault offers a range of options for handling the future of your journals and journal archives:

- Simple Journal Migration
- Advanced Journal Migration
- Migrate to a separate Cloud-based Journal
- Just-in-time Migration.

We have the solutions for your migration needs, and the commitment to help you succeed. So there's only one thing left to say:

Let's move together.
