

Secure AI Compliance Logging with Transvault Intelligent Ally

Transvault Intelligent Ally is a secure platform designed to enable enterprise's to seamlessly log and monitor the usage of AI tools. Built with rigorous compliance standards in mind, it supports adherence to ISO42001, GDPR, FINRA and HIPAA regulations by providing user AI trails across the organisation.

Why Transvault Intelligent Ally is the best choice

1

Compliance you can stand behind

Gather the data required to support ISO 42001, GDPR, FINRA, HIPAA, and other regulatory programs.

2

Defensible recordkeeping

Capture AI interactions with details such as user, chatbot, model used, and prompt date/time.

3

Built for regulated industries

Purpose-designed for finance, healthcare, legal, public sector, and other policy-heavy environments. Supported platforms include ChatGPT, Microsoft Copilot, and Google Gemini.

4

Outcome focused support

Mitigate risks of data breaches, misuse of sensitive information, or unapproved AI activity.

5

Enable innovation safely

Empower employees to use AI responsibly while reducing compliance risk and maintaining business continuity.

[Book A Demo](#)

See how your employees use AI. Smart. Safe. Auditable.

From the moment someone interacts with a chatbot, our lightweight connectors capture the prompts, responses, and metadata without disrupting how people work. Every event is tied to a named user, group, and use case so oversight is clear and actionable.
