

Managed Migration Services

Delivering fast, efficient, successful migrations

With the promise of scalable, reliable and highly available digital services, the potential benefits of the Cloud can be substantial. However, there are many challenges when migrating mailboxes, files and email archives to the Cloud,

which means that choosing the right expertise and technology is critical to the success of any migration project.

Transvault offers a Managed Migration professional service designed to deliver cost-effective, timely and seamless migrations.

"The team was able to not only execute with extreme precision, they were also really great at guiding us and giving advice when they felt there was some nuance or functionality that we hadn't considered."

Gene Glekel
VP of Technology at Cresa

Key benefits
