

# The Go-To Solution for Enterprise Vault Migrations

## Fast, Simple, and Secure Enterprise Vault Migrations

Transvault offers the fastest and most reliable way to migrate your legacy archiving environment to or from Enterprise Vault, whether you're using Notes or Exchange.

Our end-to-end, one-step migration process preserves full chain-of-custody, ensuring your data remains compliant, secure, and traceable every step of the way.

Backed by 100+ years of combined Enterprise Vault expertise, Transvault can handle virtually any source archive or data format, with comprehensive shortcut management and seamless user experience.

### Trusted by Enterprise

With nearly 20 years of experience in email archive migrations, and a team that includes certified Enterprise Vault engineers. Transvault is the trusted choice for organisations around the world for Enterprise Vault migrations.

#### We've successfully:

- Migrated over 25 PBs of Enterprise Vault data
- Delivered 1,700+ EV migration projects
- Supported businesses across regulated industries and complex environments

Whether you're moving from legacy EV versions or modernising to Microsoft 365, our proven tools and expertise ensure a seamless, secure transition.

### Built for Enterprise Vault

Transvault is engineered specifically to handle the full complexity of Enterprise Vault, no matter the version or configuration.

#### We support:

- EV versions 7.x to 14.x and beyond
- All core modules, including Mailbox, Journal, Public Folder and File System Archiving (FSA)
- Complex environments with Vault Stores, Partitioning, Indexing, and Collections

#### We migrate to:

- Microsoft 365 / Exchange Online
- Other platforms i.e. Arctera Insight, Proofpoint, Mimecast, Jattheon and PST
- New EV environments or hybrid setups
