

Microsoft 365 Migrations with Transvault OnBoard

The value of Microsoft 365 is clear. It's no longer a question of if or when to migrate, but what and how. But it's rarely as simple as A-to-B, and the path can be paved with complexity.

Well... challenge accepted. As the problem solvers of Microsoft 365 migrations, we make complexity feel refreshingly simple for our customers. We combine world-

class technology with unrivalled expertise, experience and integrity; migrating your critical office workloads quickly, securely and seamlessly with Transvault OnBoard.

Transvault OnBoard is a Cloud-based integrated workflow designer and execution product which orchestrates and automates the entire migration process of user mailboxes, files and email archives to Microsoft 365.

"Transvault has pioneered the migration market space and has produced a benchmark whereby all migration companies are measured."

Dennis Wild
Product Manager at Hewlett-Packard

Key benefits

Seamless processing, vastly improving end user satisfaction and business continuity
- 5 Integrated learning management assignment**
- 6 Access to free Microsoft 365 reporting**
- 7 Easy to use with purpose-built UI / UX**

How it works

Migration is a process, never a problem.

Transvault OnBoard is a powerful SaaS product that streamlines and governs the most challenging of migrations to Microsoft 365. Working with our Partners, they'll be able to design and automate the optimal Microsoft 365 migration experience for your user mailboxes, files and email archives:

- Drag-and-drop workflow builder to design your migration
- Direct, one-step migration for email archives -

no interim storage requirements or security risks from temporary data storage

- Set pre and post migration actions including user and stakeholder notifications
- Easily create migration group sizes from a single user to a whole department or division
- Use real-time dashboards, scheduled reports and alerts to automate and simplify your migration and communication
- Orchestrated and automated user mailbox, file and archive migration - reducing user impact and migration effort

Key features

Changing the view on Microsoft 365 migrations

Migration Performance Management

Run multiple migrations in parallel across multiple locations, teams and departments

- Set different migration policies and actions for different parts of the enterprise
- Send notifications to end users
- Deliver timely progress updates to stakeholders
- Dashboard for at a glance migration status
- Direct support for third-party email archives
- Migrate leavers, public folders, journals and PSTs

Advanced Workflows

Using OnBoard's workflow builder you can easily design a bespoke migration for your business. Making changes as you discuss them, mapping out interdependencies, defining triggers and actions to ensure you have a fully approved migration before you commit to its full implementation.

Migration Governance

By using OnBoard you can further prove due diligence of your data governance and compliance, with capabilities that include:

- Direct, end-to-end migrations with no interim formats or staging areas that could create a risk of data tampering
- Immediate setting of legal hold and retention periods as users are migrated
- Migrating leavers data and recycling Microsoft licenses according to Microsoft best practice
- Sending precise, timely migration status updates
- Creating detailed audits and reports, giving peace of mind that everything has been successfully migrated to Microsoft 365
