intelligent ALLY

INTELLIGENT ALLY

Log and retain GenAI interactions across your organisation to meet regulatory, audit, and governance requirements.

The Challenge

Generative AI adoption is accelerating, boosting productivity and innovation often without adequate visibility or governance.

For regulated organisations, this creates significant risks:

- Untracked AI usage and decision-making.
- Exposure of sensitive or regulated data.
- Inability to evidence compliance during audits or investigations.
- Growing regulatory pressure from emerging AI governance frameworks.

The Solution

Intelligent Ally provides enterprise-grade AI governance by capturing, contextualising, and retaining AI interactions in a secure, auditable, and defensible way.

What Intelligent Ally Delivers

Complete Visibility
Gain a clear, centralised view of how AI tools are being used across your organisation, who used them, when, and in what context.

Defensible Audit Trails
Reconstruct AI interactions with full metadata to support audits, investigations, and regulatory enquiries.

Policy-Aligned Governance
Apply retention, access, and control policies that align with your organisation's risk and compliance framework.

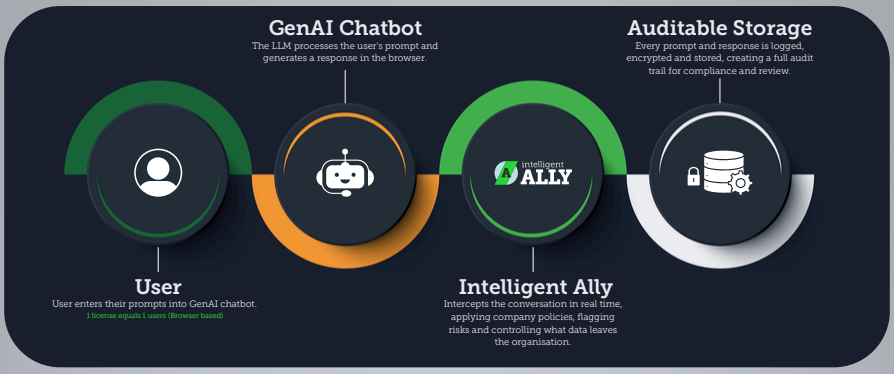

Reduced Compliance Risk
Remove uncertainty around AI usage by ensuring interactions are captured, retained, and governed consistently.

How Intelligent Ally Works

Supported AI Platforms & Environments

Copilot · Claude · ChatGPT · Gemini · Mistral AI

*and many other GenAI platforms

Key Capabilities

- PII and sensitive data detection across every AI tool
- Secure capture of AI prompts and responses
- Full metadata logging (user, model, timestamp, context)
- Configurable retention and access controls
- Integration with enterprise archive platforms
- Compliance & Regulatory Readiness
- Legal & Investigations Support
- Risk & Governance Oversight

Why Transvault

- Built on decades of information governance and compliance expertise.
- Designed specifically for regulated industries.
- Lightweight deployment that does not disrupt existing workflows.
- Secure, policy-driven, and audit-ready by default.

Request a demo

Intelligent Ally complements your existing governance strategy; it doesn't replace it.
