Enterprise Vault to Microsoft 365 Migrations

Since 2006, we've delivered thousands of successful migration outcomes for our Partners and their clients all over the world. Our expertise in Enterprise Vault to Microsoft Office 365 migrations is unrivalled; here are just a few things that set us apart from the rest:

Focus on End-User Experience

We ensure a seamless user experience as you migrate, reducing the negative impact on your business productivity and helpdesk through:

- Advanced shortcut handling
- Zero mailbox explosion with control over what is moved where
- Post-migration tidy automatically removes shortcuts

Unrivalled Performance

The faster you migrate, the faster you can decommission your old archive and start getting the full Microsoft 365 experience.

- Recorded migration throughput of 6.7 TBs a day*. This was sustained across multiple days and the project was completed in record time
- Our unique Hybrid Connector delivers speeds up to 10 x faster than other solutions
- Control migration speed and impact on an hour-by-hour basis, 7 days a week

Prioritizing Compliance

Features that meet the most demanding of legal requirements:

- No interim storage or formats means zero risk of tampering or data loss
- Full chain-of-custody reports
- Powerful investigation and remediation in the event of failed items
- Support for the Veritas recommended API connection to your archive
- Comprehensive options for migrating journal archives

It is important to note achieving best performance is always dependent on environmental factors such as network bandwidth and user loading on the legacy archive.
